

Scogin® IN 2420 gelling agent

Product Specifications:

Chemical and Physical:

Loss on drying	maximum 15%
pH	6.5 to 8.5
Viscosity (1%, 25°C)	15 to 25 mPa•s
Particle size 18 mesh BS, through	minimum 97%
Particle size 25 mesh BS, through	minimum 90%

Test Methods

2081
2070
2161
2221
2221

Ingredient Declaration/Labeling:

US: Sodium alginate

EU: Sodium alginate (E401)

Product Shelf-life / Re-evaluation Date

Two years from date of manufacture shown on product label. This applies to unopened packages, stored under dry and cool conditions.

Safety Data Sheet (SDS) available on request.

Patents

Patents

DuPont or its affiliates is owner and/or licensee of several patents related to its products. The products, processes and uses of such products referred to in this document may be covered by one or more patents or pending applications in the United States and/or other countries. DuPont does not warrant against any infringement claim arising from the sale and/or use of any DuPont product in combination with other materials; the use of any DuPont product in the operation of any process; any DuPont product manufactured to a customer's designs or specifications; or any DuPont product manufactured by any process requested by a purchaser.

Product Suitability

The information contained in this document (as well as any advice or assistance) is provided by DuPont only as a courtesy and is intended to be general in nature. Any uses suggested by DuPont are presented only to assist our customers in exploring possible applications. DuPont make no warranty, express or implied, as to its accuracy or completeness, or the results to be obtained from such information, advice or assistance. Each customer is solely responsible for determining whether the DuPont products are suitable for such customer's intended use, and for obtaining any necessary governmental registrations and approvals for such customer's production, marketing, sale, use and/or transportation of finished goods using or incorporating the DuPont products.
